

## POSTERS

Chatterjee	Dipranjan	From spin liquid to magnetic ordering in the anisotropic kagome Y-Kapellasite $Y_3Cu_9(OH)_{19}Cl_8$ : a single crystal study
Klein	Olivier	local magnetic resonance techniques
Linner	Erik	Multi-channel fluctuating field approach to competing instabilities in interacting electronic systems
Kerdi	Banan	
Humbert	Vincent	An Oxygen Vacancy Memristor Ruled by Electron Correlations
Crispino	Matteo	Slave-spin mean field for broken-symmetry states: Néel antiferromagnetism and its phase separation in multi-orbital systems
Sacuto	Alain	Spin singlet and quasiparticle excitations in cuprates: the origin of the pseudogap
Fratini	Simone	Theoretical scenarios for strange metal behavior
Mesaros	Andrej
